<i>Chapter</i>	<i>Page</i>
EXECUTIVE SUMMARY . . . . .	3
1. INTRODUCTION . . . . .	9
2. HISTORY OF U.S.-SOVIET COOPERATION IN SPACE, . . . . .	15
Background: From the Cold War "Missile Gap" to a Cooperative Space Agreement. . . . .	15
Early U.S. Interest in Cooperation . . . . .	15
The Early 1960s: Unfulfilled Promise . . . . .	17
The Late 1960s: The United States Lands a Man on the Moon. . . . .	19
The 1970s: Moves Toward Broader Cooperation . . . . .	23
Rendezvous and Docking for Space Rescue. . . . .	23
Initiation of Cooperative Space Science and Applications . . . . .	24
The 1972 Agreement . . . . .	25
The Apollo-Soyuz Test Project . . . . .	25
Post ASTP: Changing U.S. Position . . . . .	32
The 1980s: Promise for the Future?. . . . .	33
3. COOPERATION IN THE SPACE SCIENCES: THE SCIENTIFIC VIEW . . . . .	39
Introduction . . . . .	39
Past U.S.-Soviet Cooperation in the Space Sciences . . . . .	40
Scientific Basis for Future Cooperation. . . . .	45
Soviet Cooperative Priorities . . . . .	48
Summary and Conclusion . . . . .	48
4. THE VIEW FROM FRANCE: AN ALTERNATIVE PERSPECTIVE . . . . .	53
Background . . . . .	53
Astronomy . . . . .	54
Solar Terrestrial Physics . . . . .	57
Life Sciences and Materials Processing . . . . .	57
Planetary Exploration. . . . .	59
Space Applications . . . . .	59
Evaluation of French-Soviet Projects. . . . .	59
Key Issues and Policy Approaches . . . . .	61
Scientific and Economic Issues . . . . .	62
Foreign Policy Issues . . . . .	63
Military Technology Issues . . . . .	65
Implications for U.S. Policy . . . . .	66
5. U.S. POLICY ISSUES . . . . .	71
Background . . . . .	72
Scientific and Practical <i>Issues</i> . . . . .	74
Foreign Policy Issues . . . . .	77
Reduce Tensions . . . . .	77
Symbolism . . . . .	80
"Linkage" . . . . .	81
Maintaining Channels of Communication . . . . .	83
Military Technology Issues . . . . .	84
Defining Military Sensitivity. . . . .	86

# Contents—continued

Delineating Responsibilities . . . . .	90
Utilization of Sensitive Technology . . . . .	91
The Soviet Approach. . . . .	92
Summary and Conclusions . . . . .	95

## Appendixes

	<i>Page</i>
A. U.S. Cooperative Projects in 'Space Science and Applications . . . . .	101
B. Text of Public Law 98-562, Originally Senate Joint Resolution 236, and Presidential Statement. . . . .	106
C. COSPAS/SARSAT: A Briefcase Study... . . . .	109

## Tables

<i>Table No.</i>	<i>Page</i>
3-1. Potential U.S./U.S.S.R. Collaborative Activities: From OTA Workshop, May 1984 . . . . .	49
3-2. Participants in May 8 Workshop on Possible Future U.S.-Soviet Space Cooperation . . . . .	49
4-1. Budget of the French Space Agency: Breakdown offending . . . . .	55
4-2. Breakdown offending for Bilateral Cooperative Projects . . . . .	56
4-3. French Space Program: Main Scientific Programs. . . . .	56

## Figures

<i>Figure No).</i>	<i>Page</i>
2-1. Soviet Type G Booster, and U.S. Saturn V . . . . .	20
2-2. Conceptual Illustration, Soviet Manned Lunar Landing Program, 1967-73. . . . .	21
2-3. Apollo Command Module and Soviet Soyuz Counterpart . . . . .	29
2-4. Docking Mechanism Developed for Use in ASTP . . . . .	30
2-5. ASTP Mission Profile and Timeline . . . . .	31
2-6. Trajectories of the Various Halley Spacecraft Relative to a Fixed Sun-Earth Line 3.5	
2-7. Primary Operational Soviet Launch Vehicle Family, and Canceled Type-A, A-1, B-1, and Type G-1-e Boosters . . . . .	38
2-8. Artist's Depiction of Direction of the Soviet Space Program . . . . .	39
3-1. Photographic Coverage of the U.S. Apollo and Soviet Zond Spacecraft . . . . .	46
4-1. Soviet Proton Launch Vehicle . . . . .	60
c-1. Soviet COSPAS Satellite . . . . .	109
c-2. Basic Operational Configuration of the COSPAS/SARSAT System Components . . . . .	110
c-3. Through a Network of Satellite-to-Ground and Ground-to-Ground Communications Linkages, COSPAS/SARSAT Affords Coverage of the Entire Globe . . . . .	III
