

Contents

<i>Chapter</i>	<i>Page</i>
1. SUMMARY	3
Introduction	3
Major Findings	3
Natural Gas Production Potential	4
Uncertainty 1: The Gas Resource Base...	5
Uncertainty 2: Interpretation and Extrapolation of Discovery Trends	8
Uncertainty: Production From Proved Reserves—The R/P Ratio	10
Summary of Assumptions and Conditions Underlying OTA's Projections	11
Other Sources of Lower 48 Supply	11
2. INTRODUCTION.	15
3. NATURAL GAS BASICS	21
What is Natural Gas?	21
How Does Natural Gas Form?	21
Where is Natural Gas Found?	21
How is Natural Gas Discovered?..	23
How is Natural Gas Produced?	26
4. THE NATURAL GAS RESOURCE BASE .	29
Resource Base Concepts.	29
Approaches to Gas Resource Estimation . . .	31
Geologic Approaches	32
Historical Approaches,	33
Dealing With Uncertainty	36
Comparison and Review of Individual Estimates.	38
U.S. Geological Survey	38
Potential Gas Committee. . .,	40
RAND/Nehring	42
Hubert	44
Reconciling the Different Estimates	46
Is There A Consensus?	46
How Credible Are the Methods?	49
Are the Physical Implications of the Assessments Plausible?	50
A Break With Past Trends?	50
Some Alternative Explanations.	56
Conclusions	65
5. GAS PRODUCTION POTENTIAL	69
Approach Number 1—Projecting Trends in the Individual Components of Reserve Additions.	70
New Field Discoveries	70
Extensions and New Pool Discoveries, . .	74
Revisions.	78
Reserves-to-Production Ratio	81
Production Scenarios	84
Approach Number 2—Projecting New Pool Discoveries, Extensions, and Revisions as a Single Growth Factor.	86

<i>Chapter</i>	<i>Page</i>
Approach Number 3—Region-by-Region Review of Resources and Exploratory Success	90
Approach Number 4—Graphing the Complete Production Cycle	91
A Range for Future Gas Production	92
Public and Private Sector Forecasts of Future Gas Production.	94
6. OTHER GAS SOURCES—SUMMARY	99
Mexico	100
Canada	101
Alaska	102
Liquefied Natural Gas	103
Appendix A: Glossary	107

Tables

<i>Table No.</i>	<i>Page</i>
1. Gas Production Forecasts	5
2. Alternative Estimates of Remaining Conventional Natural Gas Resources in the U.S. Lower 48 States	5
3. Bases for OTA's Projections of Natural Gas Production—Baseline Assumptions: Good Market Conditions, Readily Foreseeable Technology	11
4. Estimated Total U.S. Proved Reserves of Natural Gas—1977-81	25
5. Why It Is Difficult to Compare Resource Estimates.	31
6. Alternative Estimates of Ultimately Recoverable and Remaining Natural Gas in the United States	38
7. Comparison of Potential Gas Committee Estimates of Ultimately Recoverable Gas Resources in the Lower 48 States	41
8. Field Discovery Implications of USGS Circular 725, Onshore Lower 48 Undiscovered Petroleum Resource.	44
9. Hubbert's Estimates of Ultimately Recoverable Gas Resources in the Lower 48	45
10. The Optimist's View of Gas Resources.	48
11. The Pessimist's View of Gas Resources	48
12. Returns to New Field Wildcat Drilling in the Onshore Lower 48 States, 1966-81	51
13. Historical Record: Number of New Gasfield Discoveries Proved After Six Years To Be of Significant Size	53
14. Oil and Gas Drilling Success Rates	58
15. Potential Recoverable Gas Resources From New Discoveries in the Permian Basin	62

<i>Table No.</i>	<i>Page</i>
16. Additions to Lower 48 Natural Gas Proved Reserves: Extensions and New Pool Discoveries, 1966-81	76
17. Summary of Projections of Components of Reserve Additions and R/Ps	85
18. Lower 48 States Natural Gas Production and Reserves 1981-2000—Scenario 1A: Optimistic Exploration, Rapid Production	85
19. Lower 48 States Natural Gas Production and Reserves 1981-2000—Scenario 1B: Pessimistic Exploration, Slowed Production	86
20. Arguments for the Question, “Will the Reserve Growth in New Fields Be Larger or Smaller Than the Growth Recorded in Previously Discovered Fields?”	87
21. Alternative Estimates of Growth Factors for Initial Reserve Estimates for Gasfields	88
22. Lower 48 States Natural Gas Production and Reserves, 1982-2000—Scenario 2A: Very Optimistic.	88
23. Lower 48 States Natural Gas Production and Reserves, 1982-2000—Scenario 2B: Pessimistic	89
24. Lower 48 States Natural Gas Production and Reserves, 1982-2000—Scenario 2C: Very Pessimistic	89
25. Lower 48 States Natural Gas Production and Reserves, 1982-2000—Scenario 3A.	90
26. Lower 48 States Natural Gas Production and Reserves, 1982-2000—Scenario 3B	90
27. A Comparison of Conventional Lower 48 Natural Gas Supply Forecasts	95
28. Natural Gas Imports Summary Table...	99

Figures

<i>Figure No.</i>	<i>Page</i>
1. Alternative Concepts of the Natural Gas Production Cycle If Remaining Resources Equal 400 TCF	6
2. Natural Gas Production: Additions to Reserves, and Total Reserves of the Lower 48 States	16
3. Known Oil- and Gas-Bearing Areas in the Lower 48 States.	22
4. Four Requirements for Petroleum Accumulation.	23
5. Trapping Mechanisms	23
6. AAPG and API Classification of Wells	24
7. Production Mechanics	26
8. The McKelvey Box	30
9. Discoveries of Recoverable Natural Gas in the Lower 48 States v. Cumulative Exploratory Drilling	34

<i>Figure No.</i>	<i>Page</i>
10. Probability Distribution for Undiscovered Recoverable Gas Resources in a Province	36
11. Number of Gasfields Discovered As a Percentage of New Field Wildcats Drilled, by Field Size Grouping	54
12. Number of Gasfields Discovered per Year, by Field Size Grouping	54
13. Gas Potential, Gas Well Completions, and Expenditures—1978.	57
14. New Field Wildcat Success Rate, 1966-81	58
15. Size Distribution of Discovered Oil and Gas Fields in the Lower 48 States	60
16. Known and Projected Size Distributions of Discovered Oil and Gas Fields in the Lower 48 States	62
17. Natural Gas Production From 1981 Lower 48 Proved Reserves.	69
18. Additions to Lower 48 Natural Gas Proved Reserves: New Field Wildcat Discoveries, 1966-81	72
19. Additions to Lower 48 Natural Gas Proved Reserves: Extensions and New Pool Discoveries, 1966-81	75
20. Additions to Lower 48 Natural Gas Proved Reserves: Revisions As Reported, 1966-81.	79
21. Additions to Lower 48 Natural Gas Proved Reserves: Revisions As Amended, 1966-81	80
22. Reserve-to-Production Ratios for Natural Gas in the Lower 48 States	83
23. The Growth of Year-of-Discovery Estimates of the Amount of Recoverable Natural Gas Discovered in the Lower 48 States	86
24. Future Production Curves for Conventional Natural Gas in the Lower 48 States	92
25. Two Production Futures, One Resource Base: Alternative Representations of Future Production of Conventional Natural Gas in the Lower 48 States, Based on the USGS Resource Assessment	93

Boxes

	<i>Page</i>
A. Does the Monte Carlo Technique Underestimate Uncertainty?	37
B. Rand Assessment’s Arguments Against a Large Undiscovered Oil and Gas Resource Base	43
C. A Very Brief History of Petroleum Exploration	47
D. Are the USGS and PGC Gas Resource Assessments Really Similar?	49
E. Sources of “New Gas From Oil Fields”	63
